- **Core Competencies:** Front-End Development, Web Application Development, API Integration, Workflow Automation, AI-Assisted Development, UI Design

Projects

GEOMMAND: AI-Powered Land Intelligence System

[GitHub Repository](#)

- Architected an AI-powered land monitoring platform to detect land-use changes and encroachments.
- Engineered a full-stack solution using Django, React.js, Flutter, PostgreSQL, PostGIS, GeoServer, and Docker.
- Integrated geospatial analytics and visualization for land intelligence monitoring.

LoanGuard AI: Fairness Audit and Bias Mitigation Platform

[Live Demo](#)

- Trained a supervised classification model achieving 90%+ accuracy to predict loan approval outcomes.
- Audited the model for bias using Fairlearn and explained predictions using SHAP for transparency.
- Launched an interactive Streamlit dashboard with What-If simulations and fairness analysis.
- Automated compliance reporting to streamline responsible AI evaluation.

Professional Experience

Saakra Agency — Freelance Developer

May 2025 – Jan 2026

- Delivered responsive websites and application prototypes for 2 clients, owning each project from concept to deployment.
- Adopted AI-assisted development tools to cut build time and streamline workflows.
- Refined UI/UX based on direct client feedback, improving usability across both projects.

FintechGie — Web Developer Intern

Feb 2025 – Jul 2025

- Built and maintained frontend and backend features for live web applications.
- Integrated third-party APIs and resolved performance issues to improve reliability.
- Collaborated within a Git/GitHub-based team workflow, contributing to code reviews and version control.

Education

Bachelor of Computer Science and Engineering
